Presentation Outline

- **Introduction**
  - Overview/Specifications
  - Motivations
- **Literature Review/Existing or Similar Product/Process/Algorithm**
  - Existing System
  - Problem Identification
  - Dataset Description (if applicable)
- **Proposed Design of product/ Process/Algorithm/Software**
- **Implementation of product/process/algorithm/software**
- **Results and its Analysis**
- **Conclusion and Future Scope**
- **Bibliography**

Introduction

- **Overview/Specifications**

Overview:

Vookapp is a high-performance web application designed to digitize library operations, focusing on real-time availability and user engagement.

Specifications:

Frontend: Built with React.js for a dynamic, single-page application experience.

Backend: Powered by Node.js and Express.js to handle API requests and business logic.

Data: Utilizes structured JSON for lightweight and fast data exchange.
